

FY 2001 Project Update
Pacific Coast Watershed Partnership
DU/USFS

- 1) South Slough (OR-26-9)- 50 acres of pasture and channelized creek near Coos Bay, OR. Restoration involves reconnecting the stream channel with adjacent wetlands. Restoration complete, 2002.
- 2) Leeds Island (OR-68-1)- 300 acre former island, diked for agriculture, Umpqua delta, Reedsport, OR. Private land. Restoration involves deleveling, dike breaching, and installing a new tidegate system to protect adjacent landowners. In design phase, restoration 2003.
- 3) Smith River (OR-69-1)- 150 acres of wetlands along the Smith River, near Reedsport, OR. Private land. Restoration involves deleveling and installing 3 water control structures in ditches. In permitting phase, restoration 2003.
- 4) Sandy River Delta (OR-16-3/4). 120 acres of floodplain at the mouth of the Sandy River, near Troutdale, OR. Forest Service land. Restoration involves deleveling and installing a water management system. Restoration underway 2001.
- 5) Loomis (OR-110-1)- 100 acres of seasonal wetlands near Deer Island, OR. Private Land. Restoration will involve deleveling and installing water control structures. In design phase, restoration in 2003.
- 6) Elledge (OR-76-1)- 50 acres of wetlands on the north end of Sauvie Island, near Portland, OR. Private land. Restoration will involve installing a fish friendly water control structure. In permitting phase, restoration 2003.
- 7) Gray's River, Kandoll (WA-72-2)- 180 acres of diked estuary along the lower Gray's River, near Skamokawa, WA. Private land. Restoration will involve dike breaching and reforestation. In preliminary phase, restoration 2004.
- 8) Willapa Bay NWR (WA-57-2)- 60 acres of drained pasture along south end of Willapa Bay. Restoration will involve deleveling and installing water control structures. Planning and design 2002, restoration 2003.
- 9) Julia Butler-Hansen NWR (WA-42-2)- 200 acres of drained wetlands on Tenasillahe Island, near Cathlamet WA. Restoration will involve plugging ditches, enhancing native grasslands for Columbian white-tailed deer, and reforestation. Restoration 2002.
- 10) Sand Lake (OR-72-1)- 120 acres of diked estuary at south end of Sand Lake, near Tierra DelMar, OR. Private land. Restoration will involve breaching the dike, and installing a setback levee. Restoration 2003.
- 11) Deepwater Slough (WA-4-3)- 260 acre State wildlife area near Mt. Vernon, WA. Restoration will involve deleveling, installing several water control structures, and rehabilitating the water management facility. In preliminary phases, restoration 2003.
- 12) Spencer Island (WA-88-1)- 100 acres of drained wetlands within a diked island in the Snohomish River, near Everett, WA. Restoration involves renovating existing wetlands and installing new water control structures. In planning phase, restoration 2003.

- 13) Monitoring and Evaluation (OR-66-1)- Fisheries sampling of six project areas to evaluate juvenile salmonid use and passage. Ongoing project, 2 field seasons completed.
